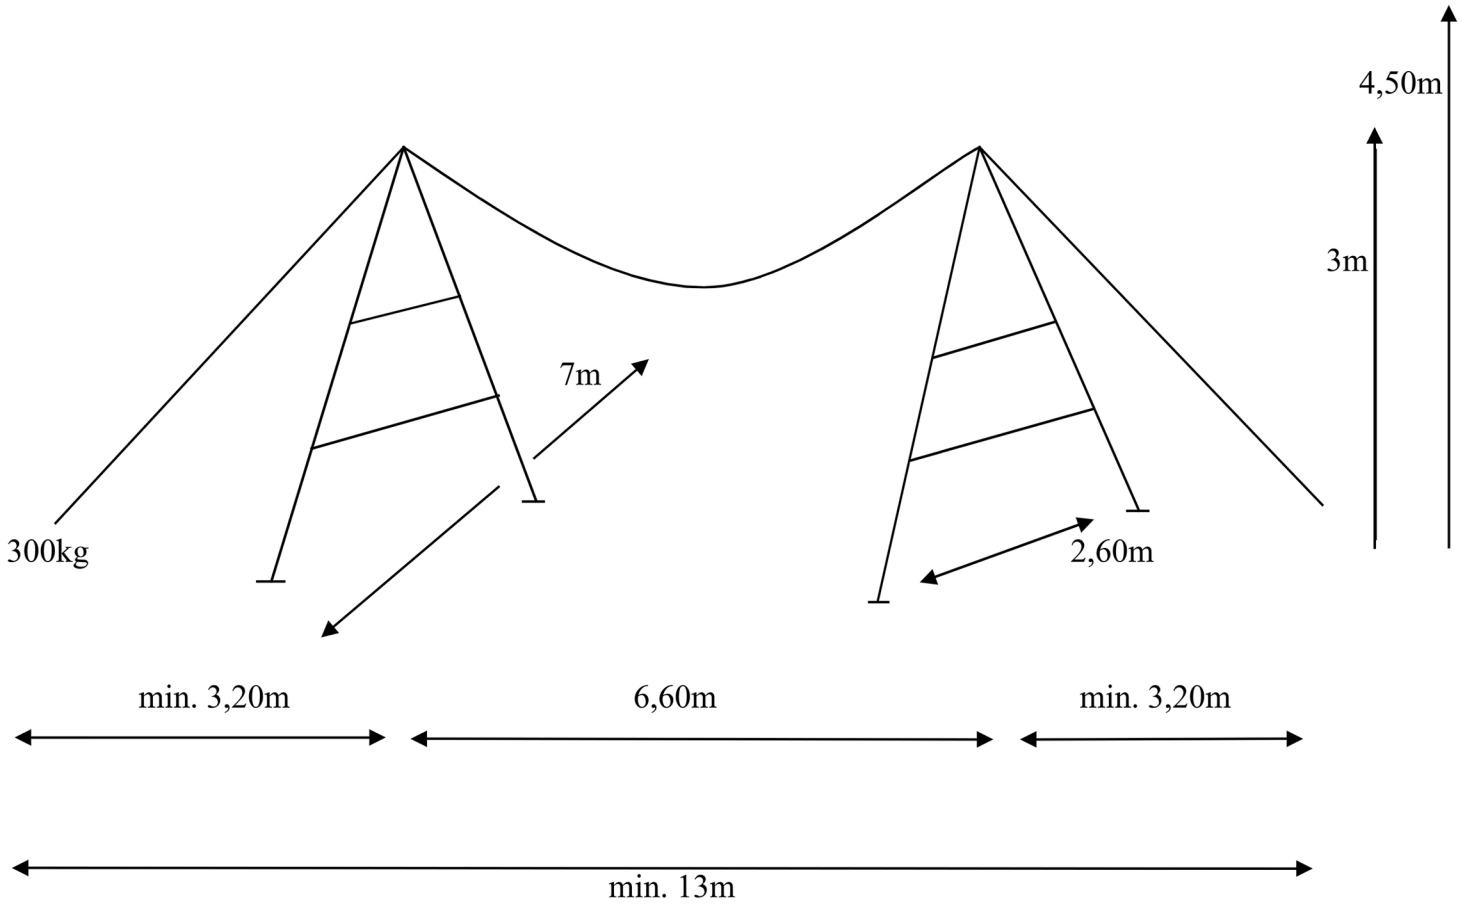
Tel.: +49 177 337 18 60



· **Two rigging points** for the rope construction with a minimum load of 300 kg are required at a distance of 13m – 15m apart (e.g. lamp posts, road signs, trees, concrete blocks or IBC water tanks).

· On grass, our own anchors can be put into the ground as rigging points by prior agreement.

· The performance area (approx. 13 m × 7 m) must be level (not sloping) and free of objects and steps.

· The minimum light height above the performance spot is 4.50m.

· For performances after sunset or in darkness, lighting must be provided by the organisers.
